

# CFS 100 Series

## Single Phase AC or DC Power Testing Simplified...

AC Power

DC Power

CFS108	CFS116	CFS140
800 VA	1600 VA	4000 VA
AC Mode: 40 - 500 Hz 5 - 150 V <sub>LN</sub> / 5 - 300 V <sub>LN</sub>		
DC Mode: 5 - 200Vdc / 5 - 400Vdc		

**Look no further** for cost effective single phase AC or DC power test solutions than the compact CFS100 Series programmable power sources. Designed to perform a wide range of AC and/or DC tests with excellent performance and reliability, the APS CFS100 units are industry work horses.

Available in three power levels of 800 VA, 1600 VA and 4000 VA, a wide range of commercial, industrial and aviation type equipment testing is covered. The CFS108 can be operated from either 115V or 230V AC power. Models CFS116 and CFS140 can be operated from single phase 230V or split phase 208V AC power.

### CFS100 Series Features:

- Choice of Power Levels to fit your Requirements
- AC and DC Mode Output Capability
- Wide AC Frequency Range of 40 Hz to 500 Hz covers both industrial/commercial and avionics/defense applications
- Extensive List of Measurements
- Fifty Memory Locations with Nine Test Steps for Pass/Fail Measurements against pre-set Limits
- Voltage Drop-out Test Capability built-in
- Programmable Start/Stop Phase Angle
- Standard USB and RS232 Remote Control Interfaces
- Optional Ethernet / LAN Interface for ATE Test System Use
- Single Phase AC Input on all models
- CE Mark

Worldwide Supplier of Power Conversion Equipment

## EASY POWER TESTING OF AC OR DC PRODUCTS

Testing both AC and DC powered products for performance to specifications and proper operation has never been easier or more cost effective than with the CFS100 Series programmable power sources. These compact rack mountable units make it easy to test single phase AC products or DC powered products, all with the same instrument.

Available in three power levels, the CFS100 units feature an intuitive menu driven user interface with a large backlit LCD display that shows settings and measurements.

Two modes of operation are available to the user:

- **Manual Mode** - Allows manual settings of all output parameters
- **Program Mode** - Allows sequencing through up to 9 test steps, each having distinct output settings and measurement pass/fail test limits

### Manual Mode or Pass / Fail Limit Testing

Auto Run MANUAL		F Lo-Lmt	40.0Hz	^
PLC Remote	OFF	Start Angle	0°	
Alarm	5	End Angle	0°	∇
Contrast	5	Results	LAST	
Power Up	OFF	OC Fold	OFF	Edit
V Hi-Lmt	300.0V	Transient	OFF	
V Lo-Lmt	5.0V	Lock	OFF	Exit
F Hi-Lmt	1000Hz	<more>		

Manual Mode Setup Screen

**Manual Mode** allows setting individual output parameter settings and limits. By setting limits on voltage and frequency, accidental output settings that could damage an EUT can be avoided. When the Test Output button is pushed, power is applied to the EUT and the LCD screen displays all measurement values. Large characters are used for Voltage and one other parameter selected from the available measurements in the upper half of the display.

M 1-1	60.0s	E: 60.0Hz	CF: 0.00	Result
Set		A: 9.00A	AP: 0.0	System
		P: 0W	VA: 0	ENET
		Q: 0VAR	PF: 0.000	<top>
100.0 V		9.00 A		

Program Mode Step Metering Display

### AC or DC Output Connections

Power On/OFF

LCD Display

Keypad

Shuttle

Programs can be stored in the 50 available non-volatile memory locations for quick recall. Each program memory can be assigned a name for easy reference to a test requirement or EUT. For quick setups of lab work, Manual mode is an easy way to change output values and observe measurement data without any limit testing.

Auto Run PROGRAM		OC Fold	OFF	^
PLC Remote	OFF	Lock	OFF	
Single Step	OFF	Mem Lock	ON	∇
Alarm	5	Volt Sense	INT	
Contrast	5			Edit
Power Up	OFF			
Loop Cycle	1			Exit
Results	LAST			

Program Mode Setup Screen

**Program Mode** allows a sequence of up to nine timed test steps to be applied to the EUT. At each step, measurements are taken and compared to pre-set pass/fail limits. If all selected measurements pass, the output proceeds to the next test step once the programmed dwell time has expired. If not, an alarm sounds and the power to the EUT is cut. This mode is ideal for production test and pass fail testing without the need to develop test software.

A	Lo-Lmt	0.00A	PF Lo-Lmt	0.000	^
P	Hi-Lmt	0W	VA Hi-Lmt	0VA	
P	Lo-Lmt	0W	VA Lo-Lmt	0VA	∇
AP	Hi-Lmt	0.0A	Q Hi-Lmt	0VAR	
AP	Lo-Lmt	0.0A	Q Lo-Lmt	0VAR	Edit
CF	Hi-Lmt	0.00	Promt		
CF	Lo-Lmt	0.00	Ext Trig.	OFF	
PF	Hi-Lmt	0.000	Connect	OFF	Exit

Test Limits Setup Screen

**All load connections** are made at the rear panel. Both AC or DC output are available on the same output terminal strip. An output safety cover is provided.

## Instrument Specifications

MODEL	CFS108	CFS116	CFS140	
<b>OUTPUT SPECIFICATIONS - AC MODE</b>				
Power Rating	800 VA	1600 VA	4000 VA	
AC Output Terminals	Rear Panel (L, N, G), Floating Neutral			
Voltage Ranges	Low / High	5 - 150V / 5 - 300V		
	Resolution	0.1 V		
	Accuracy	± (0.2% setting + 0.3 V)		
Current	150V Range	9.2 A	18.4 A	36.8 A
	300V Range	4.6 A	9.2 A	18.4 A
Over Current Capability	4x Rated, 110% for 1000 msec			
Peak Cur.	150V Range	36.8 A	73.6 A	147.2 A
	300V Range	18.4 A	36.8 A	73.6 A
Crest Factor	≥ 3 to 1			
Frequency	Range	40 - 500 Hz		
	Resolution	0.1 Hz		
	Accuracy	± 0.1 Hz		
Start/Stop Phase	Range	0 - 359°		
	Accuracy	±1%, 45- 65 Hz		
Harmonic Distortion (Full Resistive Load)	< 1.0%, 80-140V on Low Range			
	< 1.0%, 160-280V on High Range			
Line Regulation	± 0.1 V for a 10% Line Change			
Load Regulation	± 1.0% Range + 1V, R Load			
Response time	< 400 usec			
Protection	Over Current, Short Circuit, Over Voltage, Under Voltage, Over Temperature			

MODEL	CFS108	CFS116	CFS140		
<b>MEASUREMENT SPECIFICATIONS- AC MODE</b>

MODEL	CFS108	CFS116	CFS140
<b>SYSTEM PARAMETERS</b>			
Operating Modes	Program Mode, Manual Mode		
Single Step Mode	On / Off selectable		
Alarm Level	0 through 9, 0 = OFF, 9 = HIGH		
LCD Contrast	0 through 9, 0 = OFF, 9 = HIGH		
Power Up Settings	Output OFF, Output ON or LAST		
Timer	Seconds, Minutes, Hours		
Loop Cycle	0 - 9999, 0 = Cont. 1 = OFF		
Voltage Surge/Drop	ON, OFF		
Over Current Fold-back	ON, OFF		

MODEL	CFS108	CFS116	CFS140
<b>TEST MODE PARAMETERS</b>			
Memories	1 through 50		
Steps / Memory	1 through 9		
Memory Cycling	0 - 9999, 0 = Cont., 1 = OFF		
Test Limits	Frequency, Current Hi/Lo, Power Hi/Lo, App. Power Hi/Lo, PF Hi/Lo		
Ramp Up or Down	0.0 - 999.9		
Delay	0.5 - 999.9		
Dwell	0.5 - 999.9		
Step Cycles	0 - 9999, 0 = Cont., 1 = OFF		
Connect	ON, OFF		
Surge / Drop Voltage	ON: Start 0-20ms, Duration 0-20ms OFF: Start 0-99ms, Duration 0-99ms		

MODEL	CFS108	CFS116	CFS140
<b>INTERFACES AND I/O</b>			
Remote Control	RS232, USB		
LAN / Ethernet <sup>1</sup>	Option -LAN		
Digital Outputs	Pass, Fail, Test in Progress, DB9, rear panel, Relay contact closures		
Output Sync Signal	+5Vdc Out, BNC connector, rear panel		

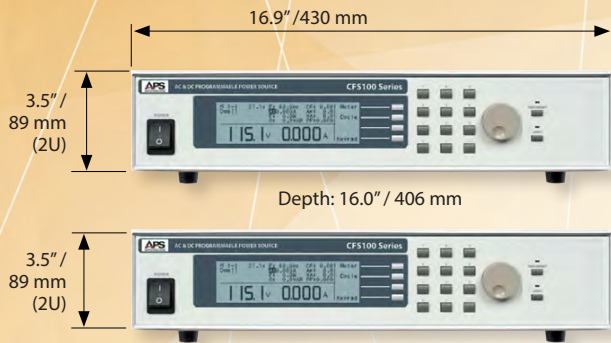

Note1: LAN option includes RS232 but deletes USB interface.

## Service and Support

Adaptive Power Systems' customer support is second to none. Our Customer Support Program provides the training, repair, calibration, and technical support services that our customers value. So, in addition to receiving the right test equipment, our customers can also count on excellent support before, during and after the sale. With company owned support and service centers around the world, support is never far away.

**New Product Warranty:** AC Sources & Loads: 1 year, DC Power Supplies: 2 years.

Complete calibration and repair services are offered at our US, European and Chinese manufacturing facilities (see contact info below). Calibrations are to original factory specifications and are traceable to NIST (National Institute of Standards and Technology).
